

General conclusion

The company (type EARL) has adjusted well to the new version of the sustainability guide (*). The written documentation is clear and satisfactory. The visit in the parcels and the interview with the manager has allowed to investigate how the guidelines have been put into use in the vineyards.

Two minor deviances were found during the audit.

No 61 minor The fertilizer was not placed under the row.

No 9 minor The manager has reduced the usage of pesticides between 25 and 50%,
under the maximum index for total sprays.

Strong point : The objective « 0 herbicides 2025 » has been met from the season of 2019.

The EARL Tange-Gérard is qualified to maintain the « Viticulture Durable en Champagne ».

Audit dated July 24th 2019.

(*) The audit has been made with the 2020 version of the guide of the certification.
